

NivoGuide[®] 3000

Guided Wave Radar

Guided wave sensor for continuous level measurement of bulk solids. The sensor is reliable and accurate and suitable for use in many different industries and applications. The intelligent software ensures that the sensor delivers precise measurement values.

NivoGuide® 3000

Customizable extensions

- For use in silos and process containers suitable for a variety of industrial applications
- Precise measurement values even in applications with strong dust generation, condensation or buildup
- Comprehensive diagnostic functions

Applications: The NivoGuide® 3000 can be used for continuous level measurement of virtually any kind of bulk solid material.

NG 3100 Rod version

Extension max. 6m
Customizable rod lengths

NG 3100 Rope version

Extension max. 75m
Customizable metal rope lengths

Technical Data

Housing	Aluminium IP 68, Stainless steel	
Certificates	ATEX, FM	
Measuring range	Rod version	max. 6m (236 inch)
	Rope version	max. 75m (2952 inch)
Process temp. range	-40°C to +200°C (-40°F to +392°F)	
Pressure range	-1 to +40 bar (-14,5 to +580 psig)	
Sensitivity	DK value ≥1.5	
Supply voltage	9.6..35V DC, 2-wire	
Meas. signal	4 - 20 mA/ HART	
Process connection	Thread from G¾, ¾ NPT range of flanges	
Process connect. material	1.4404 (SS316L) / 1.4435 (SS316L)	
Probe material	Stainless Steel	1.4404 (SS316L) / 1.4401 (SS316)
	Coating PA	
	Isolation FKM / FFKM / EPDM	

Housing types

Standard

Stainless Steel

Two Chamber

Integrated display and adjustment module

Lid with viewing window

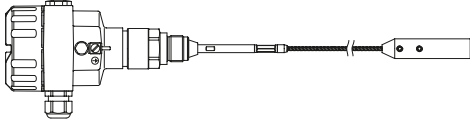

Plug-in display module

- Comprehensive diagnostic functions
- Display of latest measured values, operating parameters and diagnostic data
- Parameters entered can be transferred to other devices (optional)

Overview

- TDR sensor for continuous level measurement of solids
- Works in applications with buildup, dust generation or condensation
- Compact unit
- Wide range of applications
- Maintenance free
- Rod or rope version
- Cutable probes
- High pressure and high temperature versions
- High chemical resistance of the probe
- TDR technology (guided microwave)
- Electronic 2-wire 4 - 20 mA, HART
- Integrated Display and Adjustment Module
- Extensive Diagnostics
- Multiple approvals available
- 2011/65/EU RoHS conform

Approvals	CE		
	ATEX / IEC-Ex	Zone 0 und 0/1	Intrinsically Safe
		Zone 0/1	Flameproof
		Zone 20/21	Dust Ignition Proof
	FM	General purp.	
		Cl. I, II, III Div. 1	Intrinsically Safe
		Cl. I Div. 1	Explosionproof
		Cl. I, II, III Div. 2	Non incendive
		Cl. II, III Div. 1	Dust Ignition Proof
	Functional safety	IEC 61508	SIL 2 single-channel / SIL 3 multi-channel

Electronics	Operating voltage	9.6 ... 35 V DC, 2-wire loop Limited voltage range for Ex ia and with Display and Adjustment Module, see page 11
	Measuring signal	Current loop 4 - 20 mA according to NAMUR NE 43, HART
	Display and Adjustment Module	<ul style="list-style-type: none"> • LCD-display with background light • Display of actual measurement • Display of setup parameters (e.g. min. and max adjustment, material properties, damping, linearisation, false signal suppression) • After programming the display can be removed. The setted parameters can be copied to other units. • Display of diagnostics data (e.g. temperature, echo curve, trailing pointer) simulation of level) • Operation via push buttons

Housing	Material, version	Aluminium, single- or double chamber (powder coated) Stainless steel, single chamber (electro polished)
	Ingress protection	Type 6P/ IP66/ IP68 (0.2 bars)
	Temperature adapter	Temperature adapter for version 200°C
	Ambient temperature	-40 ... +80 °C (-40 ... +176 °F)

Overview

Mechanics and Process	Diameter rod /rope, Length of extension "L"	Rod $\varnothing 16$ mm ($\varnothing 0.63$ ") Rope $\varnothing 4$ mm ($\varnothing 0.16$ ") Rope $\varnothing 6$ mm ($\varnothing 0.24$ ") Rope $\varnothing 11$ mm ($\varnothing 0.43$ ")	300 .. 6,000 mm (11.81 .. 236") 500 .. 75,000 mm (19.7 .. 2,953") 500 .. 75,000 mm (19.7 .. 2,953") 500 .. 65,000 mm (19.7 .. 2,559") , PA coated 500 .. 65,000 mm (19.7 .. 2,559") , PA coated
	Measuring range (blocking distance)	Upper / lower blocking distance (no measurement is possible within this area)

NG 3100

- (1) Available only with PA-coating (pos.8 E, G), not with FM certificate (pos.2 H, P, U, N).
- (2) Not available with PA-coating (pos.8 E, G).
- (3) Rope / rod can be cut and changed.
- (4) Not available with flange DN100 PN6 (pos.5+6 6L).
- (5) Available with following process connections: all threads 1½", flange ASME 2" or bigger, flange DN50 or bigger.
- (6) Available with certificates pos.2 0, S, B, M, N, U.
- (7) Not available with certificates FM non incendive (pos.2 H), available with housing double chamber (pos.16 D).

Electrical Installation

4 - 20 mA

The terminals are located below the Display and Adjustment Module. To connect the unit, remove the display by gently turning the display counter-clockwise until it is free.

Wire cross-section (spring-loaded terminals) :
 Massive wire, stranded wire 0.2 ... 2.5 mm² (AWG 24 ... 14)
 Stranded wire with end sleeve 0.2 ... 1.5 mm² (AWG 24 ... 16)
 Connect cable shield to ground terminal.

Operating voltage (voltage present at terminals):

Version	Display and Adjustment Module (illuminated)	Operating voltage
Non-Ex, Ex d	without	9,6 ... 35 V DC
	with	16 ... 35 V DC
Ex ia	without	9.6 ... 30 V DC
	without	16 ... 30 V DC

4 - 20 mA HART

Typical PLC/ mA configuration with HART:

- Depending on the system design, the power supply may be separate from the PLC, or integral to it.
- HART resistance (total loop resistance, that is, cable resistance plus 250 Ohm (external resistor) must be limited to a certain value, to ensure a proper function.
 Max. loop resistance = (supply voltage - min. voltage present at terminals) / 22mA
 Example: CE-unit with 24 V DC supply: Max. loop resistance = (24 V - 9.6 V) / 22 mA = 655 Ω
- The external resistor is not required, if the PLC has an integral 250 Ohm resistor.
